*Tout l'honneur est pour moi de
collaborer dans ce project
magnifique*

Hi, I am Papy Olenga

UI/UX Designer and Web Developer.

I help individuals and companies:

- strengthen their online presence,
- attract more business, and
- develop innovative web applications.

Project #2 The richest men

Drag and drop - rank the richest men.

[View project](#)

My name is Papy Olenga.

I came across web programming fortuitously. I was trying to fit into a career path after my degree in Biology. As I was exploring my options, I started learning Python programming language on Udemy. I loved it so much that I would spend hours cramming knowledge without tiring at all. Instead of going the self-taught route, I decided to follow a formal education from an accredited institution.

I hold an Associate Degree in Computer Sciences and Information Systems from Salt Lake Community College with Certificates of Proficiency in Database Information Systems and Web Programming and Development.

I am pursuing a Bachelor's degree in Web and User Experience with a Full stack Web Development emphasis at Weber State University, in Utah. My training focuses on understanding users and their needs, selecting the right toolkit, and designing websites, applications, and services that exceed those needs. I always strive to meet the standards for responsive, accessible, and inclusive web design.

My current tech stack include:

- HTML5,
- CSS3,
- SASS,
- Bootstrap 5,
- PHP,
- GitHub,
- AJAX
- NodeJS
- JQuery
- Javascript
- MySql
- APIs.

My other skills: UI/UX Design, Prototyping, Wireframing, Netlify, Figma, Adobe photoshop.

I am also proficient in French (written and spoken). I am learning React and I am planning on adding more tech tools under my belt: Laravel, Django, SEO techniques.

In my spare time, I like doing aerial video recording with my drone.
